

NABH Document Workflows — API Specification

Base URL: `http://127.0.0.1:3000` (configurable via `HOST` / `PORT`)

All endpoints are served by `agents/apiAgent.js` .

`GET /health`

Health check. No authentication, no request body.

Response `200`

```
{ "status": "ok" }
```

`POST /api/v1/complaints/pdf`

Generates the Patient Complaint / Grievance Redressal PDF.

Pipeline: `complianceAgent` → `validationAgent` → `pdfAgent`

Field	Type	Required	Allowed values / notes
complaintId	string	Yes	Free text
dateOfComplaint	string (YYYY-MM-DD)	Yes	
timeOfLodging	string (HH:MM)	Yes	
timeAmPm	string (enum)	Yes	AM , PM
reportedBy	string	Yes	Complainant name
relationshipToPatient	string (enum)	Yes	Self , Spouse , Parent , Child , Other
relationshipOtherText	string	No	Used when relationshipToPatient is Other
patientName	string	Yes	
uhid	string	Yes	Unique Health ID
ipdOpdNumber	string	Yes	
contactNumber	string	Yes	Phone number
emailAddress	string	No	
complaintCategory	string (enum)	Yes	Clinical Care , Staff Behavior , Billing & Tariff , Facility & Amenities , Operational Delays , Patient Rights Violation
complaintDescription	string	Yes	Free text, multi-line
modeOfReceipt	string (enum)	Yes	Suggestion Box , Verbal , Email , Direct Submission
receivedByNameDesignation	string	No	
responsibleDepartment	string	Yes	
investigationSummary	string	No	Free text, multi-line
rootCause	string	No	Free text, multi-line
correctiveAction	string	No	Free text, multi-line

Field	Type	Required	Allowed values / notes
preventiveAction	string	No	Free text, multi-line
closureStatus	string	No	
closureDate	string (YYYY-MM-DD)	Yes	
qualityReviewer	string	No	

POST /api/v1/admission-advice/pdf

Generates the Admission Advice Note (AAC chapter) PDF. **All fields are required.**

Pipeline: admissionAdviceComplianceAgent → admissionAdviceValidationAgent → admissionAdviceAuditAgent → PDF generation

Field	Type	Required	Allowed values / notes
patientFullName	string	Yes	
uhid	string	Yes	
age	number (or numeric string)	Yes	
biologicalGender	string (enum)	Yes	M , F
dateOfAdvice	string (YYYY-MM-DD)	Yes	
timeOfAdvice	string (HH:MM)	Yes	
admittingDepartment	string	Yes	
attendingConsultant	string	Yes	
source	string (enum)	Yes	OPD , Emergency / ER , Day Care
contactNumber	string	Yes	
provisionalDiagnosis	string	Yes	Free text, multi-line
clinicalStatus	string	Yes	Free text, multi-line
priorityStatus	string (enum)	Yes	Routine / Planned Admission , Urgent / Emergency Admission
assignedWard	string (enum)	Yes	General , Semi-Private , Private Room , ICU / ICCU , Day Care
safetyPrecautions	array of string (enum)	Yes	Any of Fall Risk , Isolation Needed , Vulnerable Patient , None ; must be a non-empty array
vitalsMonitoringFrequency	string (enum)	Yes	Continuous , Every 1 Hour , Every 4 Hours , Stable Routine
dietaryDirective	string (enum)	Yes	NPO (Fasting) , Soft Diet , Regular Diet , Diabetic Diet
	string	Yes	Free text, multi-line

Field	Type	Required	Allowed values / notes
urgentInvestigations			
statMedications	string	Yes	Free text, multi-line
expectedPaymentPathway	string (enum)	Yes	Self-Paying / Cash , TPA / Insurance , Corporate / Government (CGHS)
financialCounselingCompleted	string (enum)	Yes	Yes , No
estimatedTreatmentCost	number (or numeric string)	Yes	Amount in Rs.

POST /api/v1/hospital-pre-registration/pdf

Generates the Hospital Pre-Registration Form PDF.

Pipeline: hospitalPreRegistrationComplianceAgent →

hospitalPreRegistrationValidationAgent → hospitalPreRegistrationAuditAgent → PDF generation

Field	Type	Required	Allowed values / notes
fullName	string	Yes	
gender	string (enum)	Yes	Male , Female , Other
dateOfBirth	string (YYYY-MM-DD)	Yes	
idNumber	string	Yes	Aadhar / Passport number
contactNumber	string	Yes	
emailAddress	string	No	
permanentAddress	string	Yes	Free text, multi-line
admittingDoctor	string	Yes	
department	string	Yes	
proposedDate	string (YYYY-MM-DD)	Yes	
stayType	string (enum)	Yes	Daycare , Inpatient (IPD)
paymentMode	string (enum)	Yes	Cash / Self-Pay , Insurance / TPA , Corporate Panel
insuranceCompany	string	No	
tpaName	string	No	
policyId	string	No	Policy / Corporate ID
preAuthStatus	string (enum)	No	Initiated , Pending , N/A
emergencyContactName	string	Yes	
relationship	string	Yes	
contactPhone1	string	Yes	
contactPhone2	string	No	

Common behavior (all three `POST` endpoints)

Scenario	Status	Response
Success	200	Binary PDF (<code>Content-Type: application/pdf</code> , <code>Content-Disposition: attachment; filename="..."</code>)
Success with <code>?store=true</code>	201	<pre>{ "document": { "provider": "...", "bucket"/"container": "...", "key": "..." } }</pre>
Malformed body / storage not configured	400	<pre>{ "error": "..." }</pre>
Missing required fields	422	<pre>{ "error": "...", "missingFields": ["field1", "field2", ...] }</pre>
Unexpected server error	500	<pre>{ "error": "Unable to generate the PDF." }</pre>

`?store=true` requires cloud storage to be configured via `CLOUD_STORAGE_PROVIDER` (`s3`, `azure`, or `gcs`) — see [README.md](#) for provider-specific environment variables.
